

2 GREAT DVD'S

How do you witness to those who claim: "If there is a God of love, what about all the nasty diseases?" Did God really invent SARS, Malaria, Cholera, River blindness, and much more. Show people the real history of disease, what is really to blame and the only long term solution. Since life didn't evolve where did the really nasty bugs come from? Easy to share and a great tool to witness with.

From Skyscrapers to Stone Age, we follow THE DEVOLUTION OF MAN through the Biblical record of man's inventions and technology. From the perfection of Creation, through the fallen world, to the new heavens and new earth. See what man's real problems are, and the only solution.

YOU CAN EVEN FIND FOSSIL BACTERIA

when you come on our creation research field trips. No matter how old you think the rocks might be, or how you think the bacteria might have got into the rocks, they are wonderful evidence that all creatures reproduce to their own kind as Genesis states God made them to do. Those on a Creation Research field trip to Australia's wild west discovered how true this is.

KALGOORLIE Geologist Wade Evans (below) speaks to the crowd, as both he and John Mackay led some forty people including Uni lecturers, geologists, students and layman, into the wilds of Australia's gold fields. The Pillow Basalt Wade is standing on is definite evidence the whole area formed under water.
