Quote: Insect Brains and Surveillance Cameras

Written by Administrator Tuesday, 07 May 2013 06:27 -

"When it comes to seeing, even a tiny insect's brain can outperform any current artificial system."

Russel Brinkworth of University of Adelaide, who claims his work could solve problems with the current poor quality of surveillance cameras. Quoted in the *Adelaide Advertiser* 29th August 2006 p 12.

Editorial Comment: Of course every surveillance camera was designed by a creative intelligence.
