## **Quote: Dawkins on Education**

"Any science teacher who denies the world is billions (or even millions) of years old is teaching children a preposterous, mind-shrinking falsehood. These men disgrace the honourable profession of teacher."

Richard Dawkins, Guardian 9 April 2002

**Editorial Comment**: Well now you know! It's war out there, and this war is hell (versus heaven). Dawkins is a professor at Oxford, and a classic example of someone who uses authoritative bombasticisms as a truth substitute to avoid debating any creationists who would expose him for what he is.
