Liberal Theologians

A 2003 debate against geologist and Anglican vicar, Michael Roberts, brought to light the force with which liberal theologians claim Genesis is a "Who dunit" and not about what was done, or how. Only science tells us that, therefore Genesis must be only symbolic, they say. However, they forget to mention that any liberal theologian who believes God did it "somehow", is actually guilty of gross inconsistency. The concept "God created" comes from reading Genesis 1:1 literally, then changing feet and claiming the creation account is symbolic. If they were consistent, even the word "God" in Genesis 1:1 could symoblise Aliens. Get the point!
