Spot the Omission

Written by Administrator Thursday, 11 July 2013 06:43 -

Spot the error. A display at the Toronto Science Centre (Canada) on calendars leading up to the year 2000 listed an orthodox Jewish calendar which, in September of this year, transitioned from 5759 to 5760. Don't be surprised - they forgot to mention it was 5760 AC (after Creation) and its coming up to 2000 AD (after the birth of Christ). The evolutionist establishment is determined to leave the truth out - even from calendars!
