## **Scientific American Survey**

Written by Administrator Thursday, 30 August 2012 10:16 -

A *Scientific American* survey says "a startling 45 per cent of Americans now believe God created life some time in the past 10,000 years,..." Even among US Catholics 40 per cent still believe this despite Pope John Paul's affirmation of the theory of evolution in 1996 - thinking the Pope is senile and should be ignored. Northern states such as Illinios, Ohio and Wisconsin have been notably affected, and even New York and Massachusetts to some degree. (Robin McKie, Science Editor, *The Observer*, 24 February 2002, p.25.)
