GOOD NEWS - JOYFUL HARVEST - NEW STAFF - GREAT FINDS.

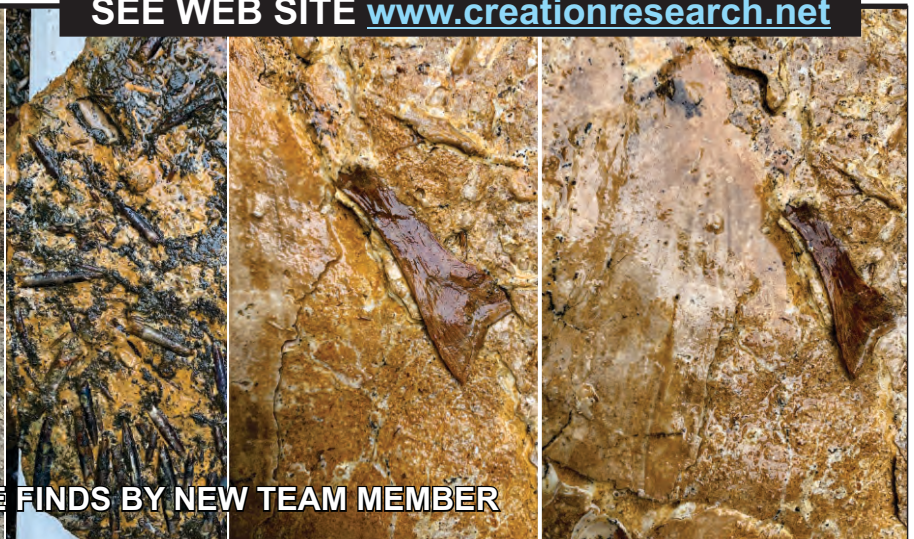

GOOD NEWS AS two high school classes visit Jurassic Ark with several more already booked following cancellation of rigid lockdown in south-east Queensland. The only proviso being "until the government does it next", so book now for your exciting visit to see and enjoy many new things.

Some 30 lockdown cancellations of public meetings from the end of July to start of September, yet we still have many blessings to share, since the repeated lockdowns also meant increased research and development time at Jurassic Ark. Sadly here, as well as in the UK, USA, etc, it has also meant revenue from sales, field trips and public meetings has plummeted, so we do need your help. Jump behind the team now and bless us through your donations.

WHAT A JOYFUL HARVEST. Back in 2012, John Mackay caught up with a young man in England who shared his exciting testimony that a few years earlier he came to one of John's meetings as an atheist, left an agnostic, and shortly after became a Christian. We caught up with him in 2021. Whilst he's had spiritual ups and downs and a tough time out of work through much of UK Covid, Sam has expressed a real desire to join our team in a voluntary capacity and serve in the one skill area we lack - social media. Sam has already started fixing our Zoom broadcast, touching up our YouTube, improving our film clip quality and promoting any of our online materials. Covid has forced a Zoom season all around the globe, so Sam's offer couldn't have come at a better time. Thank you Jesus for what you were doing with Sam to direct him to salvation service in this ministry. Pray for Sam and his wife Lani.

SEE WEB SITE www.creationresearch.net

SURPRISE FINDS BY NEW TEAM MEMBER

Linda Strydom is our newest team member. She has been a teacher who has joined us to provide full time office help. With her husband Marius, they are proving a great blessing to the ministry. Linda is shown (left above) doing mundane fossil cleaning and preparation, which has produced amazing finds. Under the dirt and lime was a very rare fossil turtle we have had for many years but didn't know it. Pray for Linda as she puts her hand to many new things to bless the work.

JAB OR JOB? COVID CHAOS? CHURCH CORRUPTION? DIVIDE CONQUER p2

**USE [PAY PAL](https://www.paypal.com) TO SUPPORT CREATION RESEARCH
OR VIA accounts@creationresearch.net.**

Fear not for I am with you, Be not dismayed I am thy God (Is 41:10)

John Mackay
International Director of
Creation Research

MINISTRY CHALLENGES THROUGH COVID CHAOS means new requests to preach on things we've not been asked since Vietnam such as "When is it right for a Christian to disobey government?" Pray for us as we also deal with related questions such as "What do you think about Covid? What about the Jab? What do the experts actually know?" One little snippet on that. One of our Advising Professors who develops drugs is currently refusing to be vaxed stating, 'It's an experimental drug and we have no idea what it will do in the long term. Another Advisor Geneticist shares, 'It's a class three experimental medicine and should not be used.' Then there's the blood specialist who's done the testing who shares how messed up many people's blood is following their vaccination, so 'I'm not doing it'. Despite the media portraying all who refuse to be vaxed as ignoramuses, selfish yahoos, the professors share it's actually doctors, nurses and professors who head the list. And none of them advise giving it to children of any age.

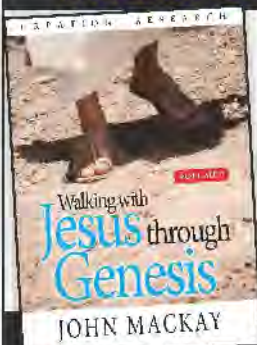

BUT HAVE YOU ASKED "Do I have natural immunity?" Several of our friends got Covid with no symptoms. Obviously their body was well equipped to cope with Covid. Other friends of ours died with Covid on top of their underlying serious health issues so they obviously weren't. The huge number of cases tell us that many get it and it has no effect on them whatsoever. Natural Immunity is up to 27 times better than VAX immunity, as Israel proves beyond a shadow of a doubt where some 80% of all people have been vaccinated, and now they're needing a third shot to deal with one of the highest reinfection rates in the world and some Israelis are lining up for the fourth shot as Pfizer adds daily to their \$30 billion (and increasing) annual income at present. See this week's Newsweek on the 14 thousand reinfections/ deaths of vaxed people.

YET DID YOU KNOW that in April 2020, only 17 months ago and 8 months before Covid vaccine would be available in Australia because Pfizer had not even thought of doing it prior to January 2020, our Government passed a rule preventing doctors blood testing you for Natural Immunity to Covid? Natural Immunity means you don't need the vax, yet Drs can by law be fined up to \$30,000 for such proof. So the stage was set for Government to force you to have the vax regardless, even before we had a vaccine. No wonder so many are afraid to even discuss this issue with you, or add "Don't mention my name --it'll cost me my job". Yes Drs have been fired for standing against compulsory vaccination so something is way out of kilter here folks. And yes even some of our long-term supporters have already lost jobs, from gardeners to head teachers, and even professors are saying they'll be next, so expect prolonged Lawsuits about the whole issue. No matter where you stand on this issue, are you willing to support the many Christians who are saying my body is the temple of the Holy Spirit, and you're not messing up what God has made with what some medical pros call a stage 3 experiment that wasn't tested for the standard 8-12 years, and not even for the previous fastest 5 years, but only for months before its release and approval. How about support for the huge number of non-Christians who object to forced meds and face economic ruin as a result? Where do you stand on them?

What a theme for a conspiracy movie eh? Money trail, deaths galore, US President order that has no Gov Authority at all, but puts fear in all, as well as Chinese plots etc.

AFRAID YET - BUT OF WHAT?... or have you missed the real issue? What most people miss is that fear is being used as a weapon - to divide our nation, families, and churches from within, just as it has been via climate chaos, then gender issues, now its Covid Catastrophe. Whenever you see such damaging fear be warned...something is amiss. Satan is hard at work and his plots can only be conquered when you fear neither man nor microbe, but the only One who should be feared - the Creator who became the Saviour. His counsel is 'Fear not you are of more value than many sparrows' (Luke 12:7). This same Triune God told us 'Don't call a conspiracy what men call a conspiracy for He alone is God the Creator and Saviour, with the only real power and purpose to bless or curse for eternity.' (Isaiah 8:12) You have His promise - He will ultimately Judge all who 'conspire' to run tomorrows world their own evil way, as they rebel against the One True God. So let us fear Him and Him alone, for only then can you share the peace of God with all.

WALKING WITH JESUS THROUGH GENESIS (Volume 1) now available.

Wonderfully devotional and encouraging to anybody's faith. As you walk through Genesis with Jesus, you will be blessed abundantly by the Word of God who was there and gave us the written word of God to open our eyes to His greatness and saving grace. READ GREAT REVIEWS AT WEB SHOP.

Author John Mackay International Director of Creation Research researches and teaches globally on the evidence God's Word is true from the very beginning, as well as debating many renowned academics. Get your copy of this book.

GREAT DAM PROGRESS at Jurassic Ark. Both rain and drought are sent by the Lord Jesus, so we have taken advantage of the current very dry Aussie weather to double our dam storage at Jurassic Ark. It was finished on a Friday - and our first small rain fell the following Tuesday - keep praying, and help us with the 6K costs.

The second of three planned sheds is now finished and thanks to all who have helped. It's made our fossil excavation so much easier, and ensuring the preservation of all evidence we have found - including some very mysterious fossils indeed (see below). The next and last shed is due to start soon. With the dam activity right beside the fossils, we have doubled the size of the levee bank, to match the height of the extraordinary 2011 flood. This will ensure protection of the site for a long time, so pray for God's blessing as several high schools have now been able to visit this site and enjoy seeing with their own eyes the evidence of Noah's flood. The total cost for this project has been around \$60,000. Well worth it, so join in there and help the project.

ANNIE DID - during our various stages of lockdown this year, Annie was part of a small group of adults and teens who visited Jurassic Ark for a wonderful day out. Small numbers have certainly made for increased personal attention. Our numbers allowed at Jurassic Ark are moderate at present so book now with Daryl on 0468 726 184 – or Creation Research on (07) 3206 4467 – or email info@creationresearch.net to see our great improvements and fabulous new Finds.

Yes - this pig's skull (below left) was buried just a couple of years ago in our fossilising pit, yet it looks to the evolutionist, like it's been there at least 20,000 years. It's a fabulous reminder that you don't need time, you need the right process to fossilise any object. Pray as we expose the lies that Satan has put into young people's minds about millions of years, making them doubt the Bible and abandon Christ.

Creation Fest Cornwall was an amazing success, despite much weather troubles on the first day - 70 mph winds eliminated any use of our marquee or outside facilities, but the Lord is good and we were able to set up our museum in the large van we had hired for the event. We engaged well over 1,000 people with our walk-in 'travelling museum' where folk saw life-size dinosaurs, and then toured around some of our amazing fossils and artefacts (pics above). Countless people were engaged via our indoor stand in the main area and by our books, leaflets and the stickers we distributed. After one theistic evolutionist spent a long time discussing creation with us he stated - "I suppose I'll have to be a creationist now - you've left me no other choice!"

Most encouraging was the kids vote on the best part of the conference... "The dinosaurs!!" they shouted loud enough for us to hear it 150m away. Bring on next year and opportunities with these kids for Christ. Pray much for all the people we met and had discussions with, as well as more future opportunities like this.

GREAT DEVELOPMENTS FOR OUR UK MUSEUM

project as we receive our first visitors in over 3 years! With the original Norwich museum being shut down due to the Pandemic, we've been quietly working behind the scenes on a new headquarters based in Shropshire, which is where the new network of museums will be based. We now have official use of a building, and a museum set-up in the works! Pray for the project as we negotiate the final details of the building, continue to develop the museum inside, and then begin to spread out to other venues across the UK. Pray also for the development of the UK Museums Trust, which will take the project forward.

We are now taking our first visitor bookings to the museum - get in touch via info@creationresearchuk.com

During August, Joseph Hubbard managed to obtain some rare and alleged 'dinosaur feathers' in amber. Yet in every way they are exactly the same as bird feathers and the only reason they are labelled 'dinosaur' is that they are found in Jurassic rocks, which supposedly formed before birds had evolved! We now have sufficient of these rare items - some Creation Museum and some for our UK Museum.

We get asked about 'Feathered Dinos' a lot by many who visit Jurassic Ark, so in addition we prepared our Curator Darryl a hand size mural (middle right) showing the 'best' example of a hairy dinosaur in which beyond a shadow of a doubt the brown tufts claimed to be remains of feathers, are proven to be very frayed protein strands. Your support enables us to hunt out the specimens that are available and gain them as part of the evidence Please continue your support

AUGUST TASSY SCHOOL GROUP visited our Creation Discovery Centre (Beauty Point). Students from year 9 and 10 at Newstead Christian School actively participated in examining evidence for Noah's Flood. One student asked about dinosaurs and what happened to them and we were able to help them. There are now many scientific papers reporting various blood and tissue being found in dino bones, all evidence the bones are not millions of years old, since bio-material couldn't possibly last that long.

A major reason our Tassie Creation Museum exists is to strengthen the faith of children from Christian families, showing them their faith is fact based and true from the very beginning of God's Word. We welcome any groups that would like to come see the centre. Contact details below.

SEE WEB SITE www.creationresearch.net**3D GRAPTOLITE****COCKROACH CHASING FISH?**

COVID FREE TIME means we have been able to catalogue, clean and prepare more of our Creation Research Museum collection, including this wonderful very tiny three-dimensional Graptolite (top left). Its name simply means 'pencil mark' as that's what they look like at first glance. I dug it up in Castlemaine Victoria in an old abandoned mine. Despite its small size, it is not only preserved whole, it is preserved in 3D. Rapid burial preserves even the finest of detail even in fossils no wider than a pencil mark. What were they? Best guess is some kind of extinct floating coral. In how many museums have you seen the evidence of Creation and Noah's flood? Catastrophic flood fossils like this fish apparently pursued by a cockroach?

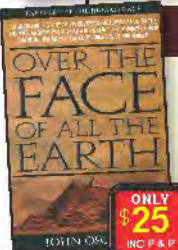

That's why our main Creation Research collection is so vital to this nation – it shows you the truth, the whole truth and what's missing from the fake science of evolution and everything based on it - from abortion to euthanasia, from Godless Government to rampant family breakdown. We have spent more than 40 years collecting these fossils and we are so grateful for those of you who have prayed so long for us. Yes we have tens of thousands of such fossils and yes they are consuming all our storage space and more, and yes we are getting to the point where we need a proper building to put them in. Jurassic Ark at present is an outdoor MUSEUM and probably is not suited for permanent big building type displays. We need you to pray with us for wisdom to seek God's will and join us in support as we cannot do it without you.

Got any specimens showing the truth of God's word or Archaeological Items the world needs to see? Consider donating them to our MUSEUM project. Two museums already in Australia, one in UK and one in Canada and one coming in Tennessee

We need a young Aussie man to join us who is called of God, willing to speak and teach the truth of God's Word and God's world from the very beginning to the very end. Contact John Mackay on 0488 098 130.

**THEY SPEAK WITH ONE VOICE by John Osgood** [BUY HERE](#)

NEW BIBLICAL HISTORY / ARCHAEOLOGY BOOK. Great resource for in depth readers, "They Speak with One Voice" is groundbreaking research bringing together the work of many of modern history's most brilliant scholars, and demonstrating the historicity and reliability of the Biblical texts in relation to archaeology. 390 pages, fully indexed.

**OVER THE FACE OF ALL THE EARTH by John Osgood** [BUY HERE](#)

The origin of today's nations and language groups is only satisfactorily explained by the Bible's "The Table of Nations" in Genesis 10. "Over the Face of All the Earth" gives an in-depth look at the historical, archaeological and linguistic evidence, and shows that only the Bible can bring order out of the chaos of what the world calls ancient history. Contains information sources the average reader is unlikely to easily find anywhere else. John is a retired medical doctor who has been studying Biblical Chronology for many decades.

**THE STONEAGE by John Osgood** [BUY HERE](#)

Despite being popularised in fiction and academia as a time when alleged human ancestors used stone tools and lived in caves because we were still 'evolving', the evidence points to an entirely different picture, that the Bible's view of history is correct. Dr John Osgood joins the dots from archaeology and history to demonstrate a clear and thought-provoking presentation of man's true history.

BUY NOW www.creationresearchshop.net.au/BOOKS

SEE WEB SITE www.creationresearch.net

For quite a while now our JA Curator Daryl has requested extra visual aids to deal with students visiting Jurassic Ark who ask about fossil people and rocks supposedly millions of years old. Dr Diane Eager and CR Director John Mackay finally got round to designing six hand held murals as well as purchasing an expensive set of top class museum 'ape-man' skulls for Jurassic Ark.

Above you will see the famous 'ape-woman' fossil Lucy's skull' (top left). When you see her in school textbooks, you get no hint that the brown parts are the only bits they ever found. Secondly they show the breaks in the bones as gaps which 'stretch her legs and make her look subhuman (top right). Kids need to know that scientists do lie which is why we keep telling people there are many theories and opinions that contradict everything in the Bible but the facts never do.

COELACANTH

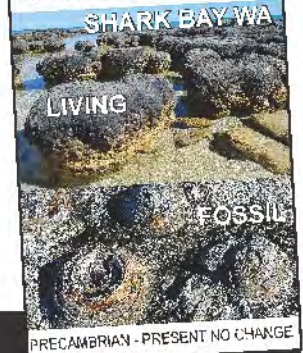

Same Kind

Our Aussie Stromatolites (right) and the Coelacanth fish (left) two of the most famous living fossils. Both fossils are in our collection. Both re-enforcing the truth that God doesn't change which is why he made creatures to produce their own kind. Even Covid, no matter how many mutant variants appear, will stay Covid. It is degenerating not evolving.

Keep praying for school groups which surprisingly have increased this year at JA despite lockdowns, and ask the Lord the teachers and students will go away knowing they were made in the Image of God not apes, and sin is man's real problem and only Jesus is the solution.

STROMATOLITES

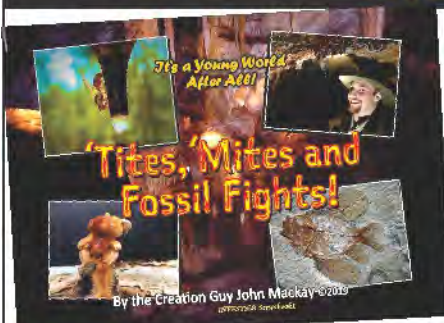

PRECAMBRIAN - PRESENT NO CHANGE

'Tites, Mites' and Fossil Fights!

Fabulous photos, exciting experiments, from the Aussie Creation Museum Jurassic Ark showing **'TIME DESTROYS, PROCESS CREATES'**. Eliminates evolutionist's millions of years. Challenging discussions for students. Full colour. (Old earth, young earth, six days) Teens/Adults

It's CONVERSATIONAL - CHALLENGING - TO THE POINT - AND SOMETIMES PROVOCATIVE!

40 pages

Dr DIANE EAGER was again at HQ (up from Canberra) after covid lockdowns have made our year really tough. She is shown holding one of the mystery fossils we have found as we continue excavating the Jurassic Ark site. Firstly, there are elongated segmented bamboo-like structures with tapered dome tops and longitudinal striations (left above). These are very different from our common fossil pine logs, and we are not sure what they are, and experts we consulted aren't either. Commonest suggestion something like bamboo.

MYSTERY FOSSILS GALORE are coming from our covid time excavations at Jurassic Ark and being sent around the world to experts, who so far have no idea what these are. Exciting eh?

The very aerodynamic fossil (right above frog) - is it some kind of giant seed pod or fruit? Is our sharp pointy thing (bottom right) a dino horn or just a pointed stick? It's been a wonderful time at JA. Your prayers and support make this possible as schools are starting to come back - so pray for us.

Plus the tons of polystrate fossils we discovered before people began returning to Jurassic Park are such a useful indicator of rapid flood type deposits. One university student is so excited and incorporating them into his university geology assignment.

The dilemma for orthodox geology is that they believe plants evolved step by step from seaweed to seed-bearing flowering plants over millions of years. Our dig site is classified as Jurassic by evolutionists (200 to 145 million years old) so it is at least 100 million years too old for bamboo or palms to be found. However, Genesis tells us all the different kinds of plants, including grasses, trees and all seed-bearing plants, were created on the third day. Therefore, when the world was destroyed by Noah's Flood, all kinds of plants were buried together as floodwaters poured across the land ripping up vegetation and soil, then dumping them together in massive catastrophic deposits as seen at our Jurassic Ark site.
