

Creator King Road Trip

Craig Hawkins is set to embark on a speaking road trip through Victoria, NSW and Queensland starting 14th June in Ballarat. Over the last 6 months we have been working hard preparing some great fossil and other evidence displays to show that the bible is true and Jesus Christ is our creator.

This great Coelacanth model (below) is part of that. The Coelacanth for many decades was only known from fossils and was presented as 400 million years old and evidence that fish grew legs and became land walking creatures. However, in 1938 an unchanged living Coelacanth was found swimming off the coast of Africa. This is fantastic evidence that things have reproduced after their own kind just as the Bible says, no matter how old you want to say the fossils are.

As part of the trip Craig will be visiting famous Dinosaur sites in western Queensland.

The full program and list of places he is speaking at is provided below. Come along and support Craig, be encouraged and bring a friend or two.

ABOUT CRAIG:

Craig works full-time with Creation Research an international creation group with museum outreaches in Australia, the United Kingdom and the USA. He is on the Board of the Creation Discovery Centre Tasmania and has presented to numerous churches and schools in Eastern Australia. This is the first national road trip he has conducted.

Craig has science degrees from the Australian National University and University of Tasmania. Together with his wife Rachelle they run Australia's only commercial seahorse farm and popular tourist attraction Seahorse World. They have six children.
